78" Double-Sided Vertical Finger Ducts with Side Mount

Vertical Finger Duct | 78 in | Double-Sided, Side Mount

1. GENERAL DESCRIPTION

This 78 in double-sided vertical finger duct provides vertical cable management for both the front and back of the rack. Mounted on the side of an individual rack, it gives plenty of room to dress large quantities of patch cords and incoming cables. Feed-through holes on the back side let cables be routed from front to back or back to front at any height, and a snap-on cover conceals the cables for a neat, clean appearance.

2. KEY FEATURES

- Double-sided design for vertical cable management at the front and back of the rack
- Large finger openings give flexibility for patch cord routing and manage cable bundles
- Feed-through holes on the back side for easier front-to-back and back-to-front routing
- Snap-on cover conceals the routed cables
- Side mount design fits on the sides of individual racks
- Complete package with mounting brackets and screws
- Plastic duct, 4 in wide × 5 in deep × 78 in high

3. APPLICATIONS

- Vertical cable management at the sides of 7 ft (78 in) distribution racks
- Organizing patch cords and incoming network cables between racks and equipment
- Data rooms, telecom rooms and structured cabling installations
- Neat, concealed cable routing on open racks

4. COMPATIBLE RACKS & CABLES

- Side of individual racks; compatible with distribution racks
- Duct length: 78 in; duct section: 4 in W × 5 in D
- Cables: patch cords and incoming network cables, routed at the front and rear
- Not for horizontal installation or cable bundles that prevent the cover from closing

5. SPECIFICATIONS

Model	78" Double-Sided Vertical Finger Ducts with Side Mount [model code ICCMSCMA83 — confirm]
Type	Vertical double-sided finger duct with snap-on cover
Height / Length	78 in (1981 mm)

Duct Section	4 in W × 5 in D (102 × 127 mm)
Material	Plastic
